

Hand guided dirt scraper

Type *Güllefix* 902 A

The dirt scraper *Güllefix* 902 A is a hand guided, battery powered tool. It has been designed for cleaning grids, in particular. With this tool you give your cows highest comfort and health. Diseases, especially on the feet, can be considerably reduced by regular use of this machine. A clean stable gives your cows a well-groomed and healthy appearance. Walkways become dryer and safer. Since the *Güllefix* is a self-propelled machine, clearing grids is no longer hard manual labour. Also, its optimum distribution of weight ensures an easy scraping of the grids. With regular cleaning you only need a few minutes per day to keep your stable permanently clean.

Basic equipment:

- V-scraper 90 cm incl. double lip (Diepothan), resistant against sal-ammoniac and ammonia
- Level compensation for a regular bottom guide
- Stable guiding-rod, foldable and adjustable on both sides
- Galvanized housing
- Large pneumatic wheels (field-wheeling) incl. tube
- Optimum distribution of weight with high traction
- Strong and silent 24 V D.C. motor
- 1 drive speed (optimum speed for grid floors)
- V-belt drive incl. overcharge securing
- Switch on-/off via robust battery switch
- Cycle-proof, total discharge proof battery
- Special charger incl. automatic shut-off; incl. Mag Code Power System (magnetic holder must be fixed on a flat surface of the *Güllefix*; impervious to corrosion)
- Double electric overcharge securing
- Battery + charger incl.

Optional equipment:

- Additional weights
